Last week a party of men came in over the route the survey for the new road has taken, and it is reported that it was composed of contractors who are looking the ground over preparatory to making their bids for the construction work. This party also was very quiet and failed to talk much. It seems to be the policy of those back of the deal to keep its doings rather quiet of late, and the Citizen representative was unable to gain much information out of those inter-

HAS FINE HEAD FOR BUSINESS. Woman's Methods That Aroused Wonder and Admiration,

"If I had my wife's head and nerve I'd own half of Wall street in less than five years," said the man. "It is the way she manages the clothes proposition that aroused me to wonder and admiration. Here is an example of her thrift.

"Early last month she bought a broadcloth dress which, with the extra charge for alterations, cost \$55. Well, after she got the suit home she didn't like it. The store objected at first to taking it back, but her per suasive tongue won them over, and after deducting \$5 for the alterations. they refunded the money. Last week, when nosing around, she saw that same suit on sale for \$35. My wife, her wouldn't fit anybody else, so there was that \$50 garment, and cheap at the price, going for almost one-third off. She of course snatched up the bargain. No more fitting or making over was necessary, so even when counting in her \$5 for alterations. she saved \$15 on the deal. I'd just and authorizing the issue of bonds like you to show me any man who could come out that well on a transaction in clothes."

Chemical Formulas,

In chemistry the elements are represented by accepted abbreviations, called symbols, each of which indicates a single atom of the element When more than one atom is to be represented, figures are placed to the right of the symbol either above or below the line. A molecule representing a compound is indicated by a series of such symbols called a for mula; thus alcohol has for its formula C2H6O, which shows that a molecule of this substance contains two atoms of carbon, six of hydrogen and one of

"How does it work?"

"It works very well, indeed. Seems to please our customers and gives the establishment an air of dignity. The only trouble we have is with me. I'm the president, you know, and I forget. There's nobody to jog my memory nor call me down. Otherwise it works all right."

The Value of Politeness.

Hollow trees are always the stiffest but the mightlest oak, it is found, can bend. Thet more exalted a man is by station, the more powerful should he be by kindness. There is no policy like politeness, since a good manner often succeeds where the best tongue has failed. Politeness is most useful to inspire confidence in the fimid and age the deserving. - The Sands
